Agenda

- **Scheduled Delivery**
- **Virtual Hosts**

Scheduled Delivery

Background

- How can I publish a message but delay the processing of the message?
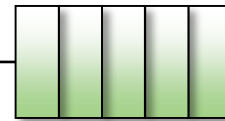

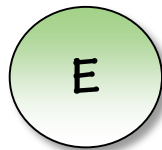

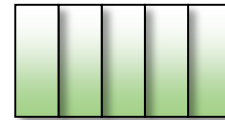

Holding Queue???

Scheduled Delivery

Message schedule reached

Holding Queue

E

Processing Queue

How can we do it

```powershell
Write-Host "Creating Exchange" -foregroundcolor green

$exchangeType = [RabbitMQ.Client.ExchangeType]::Topic

$args = @{"alternate-exchange"="Module3.Sample10.FailuresExchange";};

$model.ExchangeDeclare("Module3.Sample10.Exchange", $exchangeType,
    $true, $false, $args)
```

Demo

# Scheduled Delivery

Virtual Hosts

Background

- **Can I sandbox messaging in RabbitMQ**
- **Why**
  - Application isolation
  - Data protection
  - Support separation
  - SLA

<p style="text-align:center; color:red;">Virtual Host!</p>

Virtual Host

How can we do it

Virtual Hosts

▼ **All virtual hosts**

Filter: [ ]

Overview		Messages			Data rates		Message rates	
Name	Users (?)	**Ready**	**Unacked**	**Total**	**From clients**	**To clients**	**publish**	**deliver / get**
/	guest	0	0	0	0B/s (2.0MB total)	0B/s (9.4MB total)	0.00/s	0.00/s
Host1	guest, host1user	0	0	0	0B/s (2.2kB total)	0B/s (2.0kB total)	0.00/s	
Host2	guest, host2user	0	0	0	0B/s (1.7kB total)	0B/s (1.6kB total)	0.00/s	

How can we do it

```
var connectionFactory = new ConnectionFactory
        {
            HostName = HostName,
            UserName = UserName,
            Password = Password,
            VirtualHost = virtualHost
        };
```

Demo

Virtual Hosts

Summary

- **Challenges of real world messaging solutions**
